

# Reviewing and renewing

---

## Suggestions

Use the following framework to review your learning over a period of time. Think about ways you might build on what you have learned so far:

1. What have I learned?
2. Why is this learning important to me?
3. How did I go about learning?
4. How could I use what I learned in the future?
5. What do I want or need to learn next?
